GBURAC600B RootSpace uprights - 500mm x 70mm x 600mm

Rootsoil 20 to fill RootSpace and RootDirector spaces (including root ball volume) - allow 30 cu. m per tree. Additional allowance needs to be made for settlement

RRARBV150B Arborvent 150 single inlet aeration system  
with cast inlets

GLTWGNA twinwall geonet

GBUMOT3A - Drainage layer as per installation instructions

For increased strength and stability in soft ground conditions, specify RootSpace modules to incorporate side panel inserts to tree pit perimeter.  
Additional geonet is required where sub-base is less than 3% CBR

[illegible]

Technical cross-section diagram of a tree pit (Section A-A). The diagram shows a tree with a trunk diameter of 1200. The tree is planted in a pit with a drainage system. The pit is filled with a material (likely gravel or a permeable aggregate) and has a series of vertical drainage channels. The total width of the pit is 5000. The total depth of the pit is 2365. The diagram includes various layers and components, with dimensions and callouts indicating their specifications.

Dimensions and components shown:

- Tree trunk diameter: 1200
- Total width of the pit: 5000
- Total depth of the pit: 2365
- Grate thickness: 75
- Drainage channel depth: 1200
- Base layer thickness: 200
- Callouts point to various components: tree, grate, drainage channels, and base layer.

Additional twinwall GeoNet (GLTWGNA) to be installed where sub-base is installed below 3% CBR - Minimum 2%

The logo for GreenBlue URBAN. It features the word "GreenBlue" in a sans-serif font, with "Green" in green and "Blue" in blue. Below "Blue" is the word "URBAN" in a smaller, black, all-caps sans-serif font. To the right of the text is a stylized graphic consisting of a large green circle above a smaller blue circle, with a black upward-pointing arrow shape between them.
