

<b>Job Title:</b>	Design Civil Engineer
<b>Department/Group:</b>	Business Development Team
<b>Location:</b>	Offshore remote working
<b>Position Type:</b>	Freelance hourly – attendance required at internal team meetings

## Job Description

### OVERVIEW

As a result of a sustained increase in commercial opportunities a qualified, diligent, highly organised Design Civil Engineer with an eye for detail is required to undertake detailed tree pit and green wall project specific designs and details.

Previous experience in tree pit detailing and/or civil engineering works is strongly desirable.

### ATTITUDE AND CHARACTER

Primary attributes looked for from the candidate are as follows:

- A positive ‘can do’ attitude, self-motivated and goal driven
- Excellent attention to detail and accuracy
- Humility, Respectful & Courteous
- Ability to work under pressure and to set KPIs
- Reliable, consistent & well organized
- Efficient time management
- Ability to learn and adapt quickly
- Clear and concise communication qualities
- Ability to work well alone and as part of a team
- Able to multitask, prioritise, manage time effectively, use own initiative
- Eager to contribute to the expansion of the company

### ROLES AND RESPONSIBILITIES

- Creating project specific CAD details for tree pits
- Creating project specific CAD details for green wall wire systems
- Reviewing conflict data for utilities and below ground constraints
- Ability to review details from junior design engineers critically and sign off on details
- Attention to detail – reviewing details thoroughly for any errors / improvements
- Creating design guidance for drawings and templates as required for standardised and scalable design team work

*Please note this list is not exhaustive*

### SKILLS & EXPERIENCE

- Past experience with designing of tree pit projects strongly desirable
- Qualification in civil engineering desirable
- Experience with CAD software
