

Precast Tree Grille

Fully integrated precast tree grille systems.

Overview

Specifiers and contractors alike appreciate the GBU ArboResin Precast tree grille for its clean aesthetic appearance, its ease of installation and its reliable theft-proof steel structure which is unique to GBU. This heel-proof and wheel chair friendly tree surround boasts a highly porous finish which is perfect for SuDS installations. The gritted resin finish and complete integral irrigation system adds to the wealth of features delivered with this product.

Features

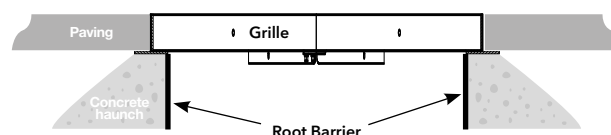

- Heavy duty galvanised support frame
- Steel tray segments supplied prefilled with Arboresin stone surfacing
- Gritted resin provides element of slip resistance
- Integrated irrigation system included
- Anti-theft lugs and central locking ring
- Stainless steel fixings
- Fully compatible / integrates with GBU below ground systems

Benefits

- Steel tray system eliminates long term ArboResin crumbling and deterioration
- ArboResin tray system is highly porous, perfect for SuDS applications
- Heelproof and wheel-chair friendly
- Prevents compaction of soil
- Permits natural irrigation and aeration of soil
- Can be disassembled if needed for major tree maintenance
- Design and built to be strong enough for light vehicular overrun

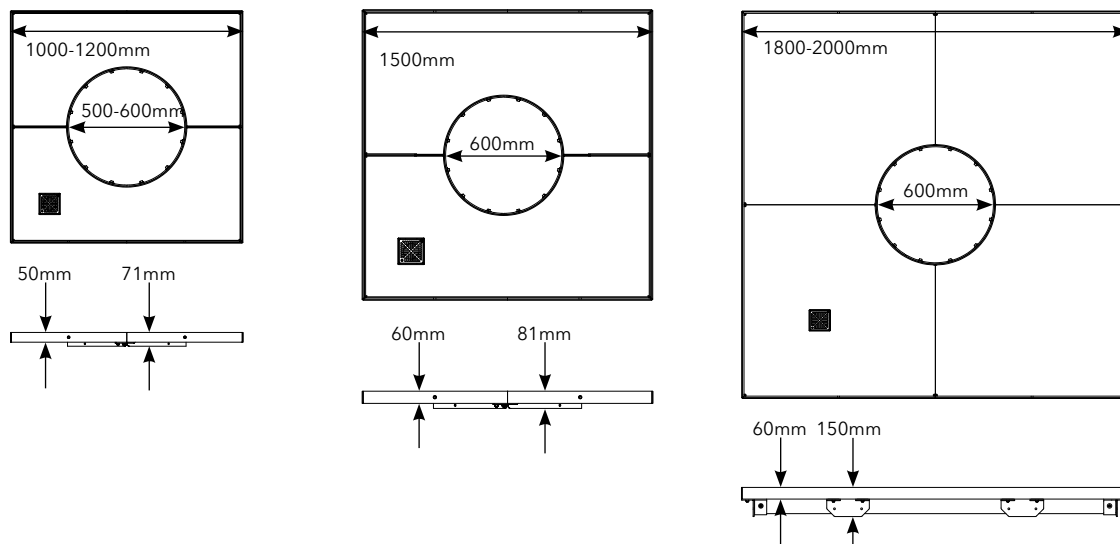

Purpose

Prevent soil compaction by bridging between concrete haunches.

Dimensions

Colours

Brittany Bronze

Silver Grey

Dorset Gold

Red Granite

Arboresin colour samples available on request. Alternative colours available for colour matching. Enquire regarding rubber crumb filling.

Permeability

Extremely free draining, fines drain through keeping the stone clear, precast tray system has no subsurface ensuring long term optimum permeability.

Vehicle Overrun

Maximum 1.5 tonne SMWL (Slow Moving Vehicle Load) - Test certificate available on request

Accessories

Available to order
Spare fixing kit
Guard to grille fixing pack

Maintenance

Annual inspection
Clean irrigation and aeration inlet filter brushes
Remove grille if central aperture threatens to restrict tree growth

Bespoke Options

Full design and development service available
Heel safe / DDA requirements
HGV loading requirements
Slip resistance requirement
Alternative stone colours / colour matching available
