

RootRain Urban Irrigation System

Overview

The RootRain Urban is a large capacity irrigation system with a fixed grid inlet, particularly suited to open space and roadside verge tree planting in softscape. The grid allows water and air through but prevents ingress of litter and debris. The RootRain Urban is particularly suited to roadside verge and open space tree planting. The inlets are trimmer resistant and can be set below mowing machine height. They have very little vandal appeal and no theft value, making them ideal for housing estates and public areas.

Features

- Large capacity 60mm irrigation system
- 100 litre per-minute capacity in porous soil
- Grid lid prevents debris and rodent ingress
- Manufactured from durable recycled materials
- Includes adjustable riser
- Automatic irrigation adapter available

Benefits

- Quick and easy installation
- Cost-effective on large and small schemes
- Vandal resistant
- Discreet and unobtrusive
- Establishes deeper rooting profile
- Increases drought tolerance & stability
- Reduces risk of surface root damage
- Protection from debris and rodent ingress
